

NEW!

CALL CARLIFT VIA APP!

CAR PARKING SOLUTIONS

Easy & contactless operation of car lifts by smartphone

With our smartphone app solution users can call and operate car lifts via smartphone. The integrated administration tool lets you easily add or manage users and restrict or grant access saving time and cost.

SMARTPHONE APP CONTROL FOR CAR LIFTS

CAR LIFT CONTROL AT THE SWIPE OF THE SMARTPHONE

Our app allows users to call and operate car lifts via smartphone, without touching lift buttons or an additional remote control. With the integration of the app, Lödige Industries offers users easy access, high levels of security as well as an intuitive administration tool for access control. The new app solution is offered across all car lift types and is available for retrofit in existing Lödige car lifts.

As a completely Bluetooth-based system, the app solution works independently from any internet connections. Not only does this prevent unwanted data access by outside parties, it also ensures independence from signal disruptions. The bluetooth connection enables flawless connectivity even in underground parking lots. Ranges of up to 30 metres away from the elevator doors are possible with the app.

SMARTPHONE APP CONTROL FOR CAR LIFTS

BENEFITS FOR USERS:

-  **Easy handling**
Car lift users benefit from the simple and intuitive handling based on typical smartphone usage patterns.
-  **Safer operation**
The personal smartphone use removes the need for any touch contact with lift controls, eradicating the risk of infection transmission. Leaving the car in front of the lift is not required.
-  **Enhanced user experience**
Car lift users will appreciate the easy and convenient use and the smooth and enjoyable interaction with the lift via the app.

BENEFITS FOR BUILDING OWNERS & MANAGERS

-  **Easy to activate**
The required hardware is added by our team during installation or retrofit and the initial account creation is easy and straightforward.
-  **Complete access control**
An integrated easy-to-use administration tool makes it simple for building owners or operators to add and manage up to 1000 users and restrict or grant access to certain times or user groups remotely.
-  **Improved security**
Access data can be collected and retained if desired, giving operators a secure and intelligent entrance control as well access data in case of damage or theft.
