

LIFTING TABLE SOLUTIONS

Express Loader - Deutsche Post AG, Warburg

Customer: Deutsche Post AG
Location: Warburg
Delivered: 2015

Lödige Fördertechnik GmbH delivered to Deutsche Post AG a particularly flexible loading table. The significant advantage: no pit is required for the installation of this lifting table.

Deutsche Post AG in Warburg has installed Express Loader in order to facilitate loading and unloading of lorries. The lifting table is mounted to the ground only with four anchor rods and it perfectly serves for loading roll containers. With the maximum lifting height of 1.4 m it can be flexibly adjusted to a lorry.

The Lödige Express Loader complies with applicable standards for lifting tables as well as with security requirements of Deutsche Post AG, which has just replaced an old model.

FLEXIBLE AND MOBILE

- Handrails of 1,000 mm height on the long sides
- Safety contact strips and PVC rollers as underrun protection
- 1 bridging track section with tension spring for loading and unloading trucks
- 1 hydraulic bridging track section to deal with floor level differences of 180 mm
- Traffic lights as positioning aids for trucks
